Andrew Daly

2014, Handbook of Choice Modelling, Cheltenham, UK and Northampton, MA: Elgar p. x, 708

ISBN: 978-1-78100-314-5_cloth; 978-1-78100-315-2_e-book

Abstract:

Twenty-eight papers provide an overview of key topics in choice modeling, summarize analytical techniques, and address current research issues. Papers discuss the foundational issues; observing preferences; modeling heterogeneity; going beyond simple discrete choice; specification, estimation, and inference; analysis and use of results; and area-specific research needs. Hess is at the University of Leeds. Daly is at the University of Leeds and RAND Europe. Index.
